

LAUNCHOPS

PROPOSAL

AI Agent Implementation & Optimization Services

Proposal No	PRO-2026-001
Date	August 5, 2026
Valid Until	September 4, 2026
Prepared For	Bloomline Apparel
Client Contact	Mike Johnson — Owner raymon4d.scales@gmail.com +44 7700 900123
Client Address	14 Marlowe Street, Manchester, M1 4BT, United Kingdom
Service Provider	LaunchOps AI 27 Baker Court, London, EC1A 1BB, United Kingdom
Provider Contact	Raymon (Abdulrahman Suleiman) — Founder abdul123rahmanj@gmail.com +44 7700 900456

1. Executive Summary

LaunchOps AI is pleased to present this proposal to Bloomline Apparel. We will design, build, and deploy a done-for-you text AI agent for your ecommerce business that handles every inbound customer conversation — order status lookups, product and sizing questions, and abandoned cart follow-up — automatically and around the clock, without adding headcount. The agent will also qualify wholesale and bulk-order leads and hand them directly to you, so no bulk order is ever missed and no bulk pricing is ever negotiated by a bot.

Bloomline Apparel currently receives 40-50 inbound messages per day across Instagram DM and website chat, and a single support person is maxed out. This solution answers customers instantly, recovers revenue from abandoned carts, and surfaces every bulk-order opportunity — with full visibility through a real-time dashboard.

Key Highlights

- 24/7 automated handling of Instagram DMs and website chat
- Abandoned cart recovery — every cart followed up automatically
- Bulk and wholesale order leads qualified and flagged to Mike — human handoff on your terms

2. Understanding Your Needs

2.1 Current Situation

Bloomline Apparel is an ecommerce brand selling women's activewear. Today, every customer message lands on one support person. Between Instagram DM and the website chat widget, the store receives roughly 40-50 inbound messages per day — about half are 'where is my order' queries and half are pre-purchase sizing and product questions. Abandoned carts are not followed up on at all, and the existing support capacity is maxed out — which is why hiring a second support person is being considered.

2.2 Goals & Objectives

Bloomline Apparel wants measurable, visible outcomes: never miss a customer query on any channel; answer order-status and pre-purchase sizing questions faster than manual support allows; recover revenue from abandoned carts automatically; qualify wholesale and bulk-order leads before any human handoff; and keep full visibility into every conversation through a dashboard.

2.3 Key Requirements

- Order status lookups — instant 'where is my order' answers pulled from Shopify
- Product and sizing answers for pre-purchase questions
- Abandoned cart follow-up via email, without duplicating Klaviyo sends
- Wholesale and bulk-order lead qualification with direct human handoff to Mike

3. Proposed Solution

3.1 Overview

LaunchOps AI will build a done-for-you text AI agent for Bloomline Apparel, deployed on GoHighLevel (GHL), n8n, and Supabase, trained on your product catalog and brand voice, and wired into the channels your customers already use.

3.2 Deliverables

Deliverable	Description	Timeline
AI Agent Build & Training	Text AI agent trained on Bloomline Apparel's product catalog and brand voice — order status lookups, product and sizing questions, abandoned cart follow-up, and bulk-order qualification with human handoff	7-10 business days
Integrations	Shopify (order status), Instagram DM, website chat widget, and email (abandoned cart follow-up), plus read-only Klaviyo so the agent never duplicates an email already going out	Within 7-10 business days
Dashboard Setup	Real-time KPI dashboard: conversations by channel, AI-resolved vs. human handoff, bulk-order leads flagged, response times, and outstanding follow-ups, filterable by last week or last month	At launch, within 7-10 business days

3.3 Approach & Methodology

- Phase 1 — Discovery & Intake: requirements confirmed, onboarding intake form completed with product catalog and brand voice guidelines, and build kicked off once the setup fee and signed Service Agreement are in place
- Phase 2 — Build & Train: agent built and trained; workflows configured across Shopify, Instagram DM, website chat, and email; read-only Klaviyo wired in; GoHighLevel CRM layer, n8n automation, and Supabase data storage stood up
- Phase 3 — Review & Launch: end-to-end testing, one round of revisions included, then go-live across all channels
- Phase 4 — Optimize & Support: ongoing refinement from real conversations — monitoring, response and objection-handling tweaks, and integration maintenance

3.4 Why This Approach

This approach is done-for-you: LaunchOps AI builds, deploys, and manages everything, so Bloomline Apparel needs no infrastructure to run and no technical staff to hire. It is fast — a working agent is typically live within 7-10 business days of receiving the intake form. It fits your stack — GoHighLevel as the CRM layer, n8n for automation and orchestration, and Supabase for a clean record of every conversation. And it keeps improving — refined from real conversations, with full dashboard visibility throughout.

4. Investment

4.1 Pricing Options

Option A — Done-For-You Text AI Agent (Recommended)

Item	Price
One-time setup fee — build, testing, and deployment across all four integrations	\$3,000
Monthly optimization & maintenance — ongoing monitoring, refinement from real conversations, and integration upkeep	\$750 per month
Total — initial investment due before build	\$3,000

The setup fee covers everything through go-live and is billed in USD as invoice INV-2026-001, currently AWAITING PAYMENT. The monthly optimization & maintenance retainer of \$750 per month is billed

on the 1st of each month after go-live; a payment receipt (RCP-2026-001) is issued via Stripe once the setup fee is paid.

4.2 Payment Terms

- One-time setup fee of \$3,000 USD due before the build begins
- Monthly optimization & maintenance fee of \$750 per month billed on the 1st of each month
- A 5% late fee applies to any invoice more than 5 days past due
- Payments processed via Stripe

4.3 What's Included

- Done-for-you build, testing, and deployment across all four integrations (Shopify, Instagram DM, website chat, email), plus read-only Klaviyo
- GoHighLevel CRM layer, n8n automation and orchestration, and Supabase data storage with a clean record of every conversation
- Real-time dashboard: conversations by channel, AI-resolved vs. human handoff, bulk-order leads flagged, response times, and outstanding follow-ups — filterable by last week or last month
- Ongoing optimization & maintenance: monitoring, refining responses and objection handling, and keeping integrations maintained

4.4 What's Not Included

- Major scope additions — new agents, new integrations, or new verticals — are billed separately
- Bulk or wholesale pricing negotiation — the agent qualifies and hands off bulk-order leads but does not negotiate pricing

5. Timeline

Phase	Duration	Start	End
Phase 1 — Discovery & Intake	1-2 business days	August 5, 2026	August 6, 2026
Phase 2 — Build & Train	4-6 business days	August 7, 2026	August 13, 2026
Phase 3 — Review & Launch	2-3 business days	August 14, 2026	August 18, 2026
Total	7-10 business days	—	—

The build timeline is typically 7-10 business days from receipt of the intake form. Indicative dates assume kickoff on August 5, 2026, pending the signed Service Agreement, setup fee, and completed intake form; all phases complete well before the proposal expires on September 4, 2026.

6. Why LaunchOps AI

6.1 Our Experience

LaunchOps AI designs, builds, and deploys done-for-you AI agents — voice and text — for businesses across verticals, handling high volumes of inbound customer conversations, qualifying leads before human handoff, and following up automatically. Every deployment is managed end-to-end on GoHighLevel, n8n, and Supabase, with a real-time dashboard so clients

keep full visibility.

6.2 Case Studies

Ecommerce Messaging Automation. LaunchOps AI deploys exactly the pattern proposed here: a text AI agent on Instagram DM and website chat that answers order-status and pre-purchase questions instantly, recovers abandoned carts with automated follow-up, and flags bulk-order leads for human handoff — keeping a busy ecommerce store covered without adding headcount, with full dashboard visibility throughout.

6.3 Our Team

Name	Role	Relevant Experience
Abdulrahman Suleiman	Founder	Founded LaunchOps AI; builds and deploys done-for-you AI agents (voice and text) on GoHighLevel, n8n, and Supabase for ecommerce and service businesses

7. Next Steps

- Review this proposal
- Sign the Service Agreement
- Complete the onboarding intake form
- Kick off the build once the signed Service Agreement and setup fee are received

8. Terms & Conditions

- This proposal is valid until September 4, 2026.
- All pricing is in USD and excludes taxes and additional fees unless stated otherwise.
- The one-time setup fee of \$3,000 is required to begin the build and is non-refundable once work has commenced.
- One round of revisions is included; further revision rounds are billed at LaunchOps AI's standard rate.
- This proposal is confidential and intended solely for Bloomline Apparel.
- The engagement runs month-to-month after go-live; either party may end it with 14 days' written notice.
- Upon acceptance, the LaunchOps AI Service Agreement (CON-2026-001) governs the engagement.

9. Acceptance & Signatures

By signing below, both parties accept the terms set forth in this proposal.
